

## >>>> Agrilive™ <<<<<

**AgriLive™ is Snipe's precision irrigation and fertilization platform, designed to provide intelligent, control of water and nutrient management, optimizing crop yield.**

**AgriLive™ automates irrigation and fertilizer dosing based on real-time field conditions. AgriLive™ drives sustainable farming, reduces resource waste, and maximizes profitability and farming sustainability**

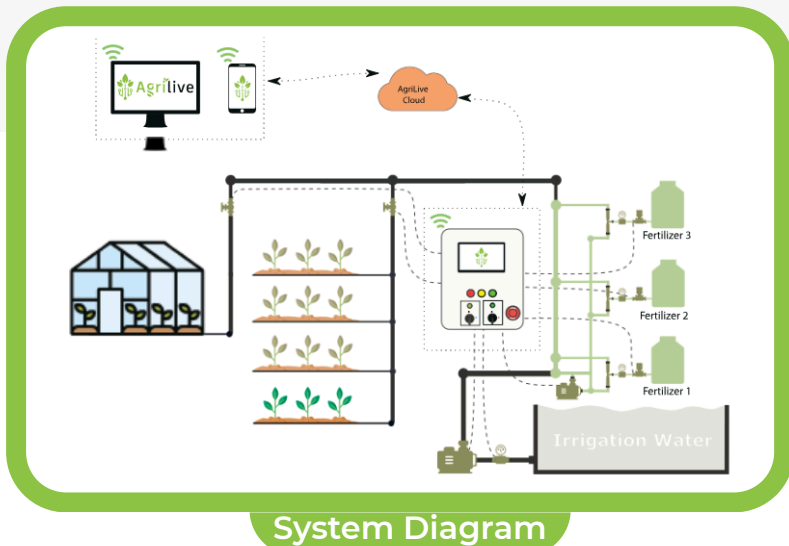

## Platform Highlights

- Integrated precision irrigation and fertilization controller
- Real-time monitoring of field conditions (soil, climate, water flow, EC, pH)
- Local and remote access via web and mobile interface
- Scalable and configurable architecture
- Wired and wireless sensor integration, valve control
- Data logging, alert, and notification reporting
- AWS Cloud-based platform

# Platform Benefits

- **Optimized water usage and precise nutrient delivery**
- **Increased crop yield, quality, and improved crop health**
- **Reduced labor costs**
- **Enhanced farm productivity**
- **Improved sustainability and farming profitability**
- **Higher return on investment (ROI)**
- **Real-time data visibility**

## Platform Models:

- AgriLive Mini (1-Phase):** supports up to 5 donums
- AgriLive Basic (1-Phase):** supports up to 15 donums
- AgriLive Pro (3-Phase):** supports up to 25 donums
- AgriLive Ultimate (3-Phase):** supports 200+ donums
